## **POST-OPERATIVE WOUND CARE**

1. Wash once daily with mild soap and water.
2. Pat dry.
3. Apply a generous layer of Vaseline ointment twice daily.
4. Apply a new bandaid with each dressing change.
5. If the dressing becomes wet replace it with a dry one.
6. Continue application of Vaseline until the wound is healed, this may require up to 14 days.

If any problems or questions arise please call the office.

As a REMINDER, it can take up to 2 weeks  
for biopsy results to return.
